Why Organic?

The word organic refers to the growth, processing, and packaging standards of an agriculture product. Organic products have been grown under the supervision of the USDA via a regional certifying agency. Current regulations forbid genetically altered or engineered products in the growth or make-up of the plant. The processing and packaging must meet a standard of cleanliness similar to that of kosher certification. No irradiation or fumigation is allowed in this process. The purchase of organic products helps fuel an economy that ultimately benefits your body, the farmer, and the earth.

Certified Organic Sunflower Oil

Sunflower oil can retain moisture in the skin. Studies have shown it may also provide a protective barrier that resists infection.

Certified Organic Beeswax

Beeswax is the only animal ingredient we use. It is used as a thickening agent. It has emollient, soothing and softening properties and helps the skin retain moisture.

Certified Organic Calendula Extract

Calendula (marigolds) assist in the treatment of minor skin disorders such as cuts, scrapes, and minor wounds. The oil has anti-inflammatory properties and temporarily relieves the symptoms of inflamed and irritated skin conditions. Because of Calendula's many wonderful properties we have chosen to use it in all of our lip balms.

Certified Organic Flavors

We use only certified organic essential oils to flavor our lip balms. The only exception is our vanilla flavor, which is made with real organic bourbon quality vanilla beans.

Rosemary Extract & Vitamin E

Rosemary extract and Vitamin E are natural preservatives that work to quench free radical activity.
